Parent Worksheet for HS Choice Application * Not the application *

**Step 1:**

Read the four steps involved in completing the application, and select “Next” at the bottom right of the screen.

*If a window pops up that says “Select SLC for High School of Residence”*

Please select one of the options. You will have the ability to adjust the rank order of your choices after you have made more selections.

**Step 2:**

All options that your student qualifies for, district-wide, will be available to choose from on this screen. Select up to five more options. List your choices and their rank order below, as a reference.

** ensure that the rank order on the screen matches what you wrote on this paper. Then click “certify” at the bottom of the screen. Then click “Next”.

*Please note:*
This is not an official High School Choice application and does not replace completing the School of Choice application online through your ParentVue account. It is the parent/guardian’s responsibility to obtain proof that the application was completed online. All completed applications will generate a confirmation email to the address listed on the ParentVue account.
Step 3:

1. Click “yes” on any additional interests your student might consider for next year. This is not a guarantee of admission nor is the student obligated to join, it just helps our teams anticipate demand for a program.

2. Click “yes” to acknowledge LBUSD District Policies:
   
   a. Transportation is not provided for any program.
   b. There is no residential priority for Secondary Specialized Pathways
   c. There is no priority for siblings, alumni, or childcare needs for any pathway.

3. When complete, click “Certify” at the bottom of the screen and click “Next”.

Step 4:

1. Review your application for accuracy.

2. When done, click “certify”.

If the screen is green at the bottom, it should read “Congratulations, Application Complete”. At this time, you can print a copy of your confirmation by clicking on the “Show PDF”, or logging into your email, where a copy will have been sent.
